As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group xx.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge or skill in technology...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Design Plan: Sanjalika Water Park	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10-01-2022	Version 1.0	Page No: 1 of 20

Problem Definition

I. Problem Definition

Currently, when people's needs for fun issues are increasing, so thrilling games are developing more and more. Along with the development of technology and the widespread popularity of the internet, websites are becoming a handy tool for users to manipulate quickly and conveniently.

In order to grasp the needs of customers that have many water park websites established and developed, we can buy tickets online without having to go to the place to buy and help update information quickly. Besides, customers can also provide comments on service quality to improve the best services. Along with that are entertainment programs that are constantly updated on the website.

II. Problem Identify

- Provide entertainment services
- Various services
- Buy tickets, book seats automatically
- Search place
- Collect comments to improve service quality
- Provide special programs for customers

III. Customer

- Experience exciting games
- Offers featured images and videos

Customer Requirements Specifications

User:

1. List of inputs to the system:

- Member registration data
- System login data
- Send feedback to the admin
- Search product/ticket
- Search for order code

2. List of process to the system:

- Check registration information already exists or not
- Check login information
- Check information feedback
- Check the product/ticket is in stock or not..and some other handling
- Check whether the product/ticket search keyword exists in the database or not
- Check order status

3. List of output to the system

- Do not leave the fields blank, Registration information already exists, Registration is successful, Password must be from 6 characters
- Incorrect login information, Login successful
- Fields can't be blank, send feedback successful
- Product/ticket does not exists, Product/ticket in stock is out of stock, Order successful
- No product/tickets found, Returns an array of product/tickets list
- Order not found, Order status

Webmaster:

1. List of inputs to the system:

- Webmaster's login info
- Product/Ticket information
- Respond to Customer's feedback
- Update on company news

2. List of process to the system:

- Check and validate login info
- Add/Edit/Delete information on selected products/tickets
- Check and validate responses to feedbacks
- Add/Edit/Delete updates on company news

3. List of outputs to the system:

- Notify login successful/failed
- Notify add/edit/delete selected products/tickets successful/failed
- Notify add/edit/delete update successful/failed
- Notify responses to feedbacks sent successful/failed

Design Plan: Sanjalika Water Park	Document Name: Final checklist	SWD/Form No.07/FC/Ver1.0
Effective Date: 10-01-2002	Version 1.0	Page No: 12 of 20

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	Yes
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	Yes
3	Are the GUI content devoid of spelling mistakes?	Yes
4	Is the application user-friendly?	Yes
5	Is the Website launching correctly in all popular browsers?	Yes
6	Are all the forms validated with proper criteria?	Yes
7	Do all text links lead to the appropriate website?	Yes
8	Do all image links lead to the appropriate website?	Yes
9	Are all the images and links clearly visible on the page?	Yes
10	Does the Web page work properly in all the tested browsers?	Yes
11	Does the Web page take too long to be loaded fully?	Yes
12	Is the navigation sequences correct through all the Web pages on the site?	Yes
13	Is the JavaScript code working as expected in all click events?	Yes
